Shaofei Liu

AI Engineer

Research-oriented graduate in Robotics and Mechatronics with solid knowledge of artificial intelligence, sensor fusion, and signal processing. Experienced in the development and simulation of intelligent systems for radar, embedded systems, and robotics. International education (Germany/China) with a focus on data-driven and model-based approaches for adaptive technical systems.

Personal Information

Address
Höglwörther Straße 369
81379 München
Deutschland

Phone
+49 1779092448

Email
shaofei.liu@shaofeiliu.com

Website
www.shaofeiliu.com

Skills

Programming

- Python (Deep Learning with PyTorch)
- C++ (Algorithm Development)
- CUDA (Kernel implementation, GPU-accelerated computing)

Machine Learning & Data Processing

- Development and evaluation of data-driven models
- Processing of sensor and image data

Simulation & Engineering

- CAD: SolidWorks, AutoCAD
- Modeling and Simulation: MATLAB / Simulink

Cloud & Software

- ML projects on AWS
- Git, LaTeX, MS Office

Languages

- Chinese (Native)
- German (C1, TestDaF)
- English (C1, IELTS)

Professional Experience

05/2025 – Present
AI Engineer (Project-based)
Munich, Germany

- Modeling complex dynamic systems and developing data-driven methods for intelligent decision support.
- Design and prototyping of AI-powered software systems leveraging knowledge graphs, machine learning, and retrieval technologies.

03/2024 – 04/2025
Software Developer
The Pets Team GmbH & Co. KG, Grünwald, Germany

- Development and optimization of software architecture and interfaces for Android-based smart devices with OTA update functionality.
- Design and integration of AI-driven applications for automated content generation and customer service chatbots.

03/2023 – 12/2023
AI Development Intern
Wisemed Medical Technology Co. Ltd, Beijing, China

- Development and evaluation of AI-based diagnostic tools for analyzing and predicting disease-related features based on patient data.
- Active contribution to image-based classification systems supporting clinical decision-making processes.

03/2019 – 09/2019
Algorithm Development Intern
Continental Automotive GmbH, Regensburg, Germany

- Development of obstacle detection algorithms based on MIMO FMCW radar data.
- System integration and testing to achieve measurable improvements in detection accuracy.

Education

10/2019 – 03/2023
Master of Science in Robotics, Cognition, Intelligence
Technical University of Munich, Germany
Master's Thesis: RNNs with Independency Assumptions: Scalable and Efficient Sequence Learning

10/2018 – 09/2019
Bachelor of Engineering in Mechatronics / Precision Engineering
Munich University of Applied Sciences, Germany
(Sino-German Double Degree Program)

09/2015 – 09/2019
Bachelor of Engineering in Mechatronics
Tongji University, China
Bachelor's Thesis: Development of an obstacle detection algorithm using MIMO FMCW radar
