

Personal Information

Address

Hanguangbeilu 10
710068, Xi'an, Shaanxi
China

Phone

+49 177-909-2448

E-Mail

shaofei.liu@shaofeiliu.com

Web

www.shaofeiliu.com

Skills

Programming

- Python (PyTorch, NumPy, Pandas)
- C++ (Algorithm Development)
- CUDA (Kernel Implementation, GPU-accelerated Computing)

Machine Learning & AI

- Deep Learning & Data-driven Modeling
- Anomaly Detection & Classification
- Explainable AI & RAG/LLM
- Model Training & Evaluation

Sensors & Data Processing

- Sensor Fusion & Multimodal Data
- Time Series & Signal Processing
- Computer Vision

Simulation & Engineering

- ML Projects on AWS
- MATLAB / Simulink
- SolidWorks, AutoCAD
- Git, LaTeX, MS Office

Languages

- Chinese (Native)
- German (C1, TestDaF)
- English (C1, IELTS)

Shaofei Liu

AI Engineer

AI Engineer with a strong background in artificial intelligence, machine learning, sensor fusion, and signal processing. Experience in developing intelligent systems for heterogeneous data, radar, embedded systems, and robotics. Knowledge of deep learning, data-driven modeling, and AI-based software solutions. International academic and professional background in Germany and China.

Professional Experience

05/2025 – Present

AI Engineer (Project-based)

Munich, Germany / Shanghai, China

- Development of AI-based systems for heterogeneous data processing and decision support in cultural technology and aviation safety.
- Design and prototyping of intelligent software systems leveraging machine learning, knowledge graphs, and retrieval technologies.

03/2024 – 04/2025

Software Developer

The Pets Team GmbH & Co. KG, Grünwald, Germany

- Development and optimization of software architectures and interfaces for Android-based smart devices with OTA update functionality.
- Design and integration of AI-driven applications for automated content generation and customer service chatbots.

04/2022 – 12/2023

AI Engineer

Wisemed Medical Technology Co. Ltd, Beijing, China

- Development of AI-based methods for analyzing medical imaging and patient data to support diagnostic decision-making.
- Contribution to image-based classification systems and multimodal processing of clinical data as a foundation for a Medical Digital Twin.

03/2019 – 09/2019

Algorithm Development Intern

Continental Automotive GmbH, Regensburg, Germany

- Development of algorithms for obstacle detection based on MIMO-FMCW radar data for intelligent environmental perception.
- Optimization of radar signal processing through system integration and testing to improve detection accuracy.

Education

10/2019 – 02/2022

Master of Science in Robotics, Cognition, Intelligence

Technical University of Munich, Germany

Master's Thesis: RNNs with Independency Assumptions: Scalable and Efficient Sequence Learning

10/2018 – 09/2019

Bachelor of Engineering in Mechatronics / Precision Engineering

Munich University of Applied Sciences, Germany

(Sino-German Double Degree Program)

09/2015 – 09/2019

Bachelor of Engineering in Mechatronics

Tongji University, China

Bachelor's Thesis: Development of an obstacle detection algorithm using MIMO FMCW radar
